Task 2: [Interpret phishing simulation results](#)

Task Overview

What you'll learn

- How to identify which areas of the business need more awareness about phishing
- How to design and implement the appropriate training for those teams to lower our risk of an attack

What you'll do

- Create a short presentation to help teams improve security awareness

Task 2: [Interpret phishing simulation results](#)

It's time to identify and train your teams

The phishing simulation designed in the first task was run last week. So, what's next?

We've used some tools to analyze the results and we can see the failure rate of each department – it is clear that some teams appear more likely to fall for a phishing email than others.

Now that we have these results, we need to:

- identify** which areas of the business need **more awareness** about phishing, and
- design** and **implement** the appropriate **training** for those teams to lower our risk of an attack.

Task 2: Interpret phishing simulation results

Interpret the results

First, let's have a look at the results of the phishing campaign.

This table helps you to identify which teams appear to be **more likely** to fall for a phishing email than others.

Team	Email open rate	Email click-through rate	Phishing success rate
IT	80%	2%	0%
HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	66%	28%	18%

When you're ready, start the quick quiz to see if you've correctly identified the most vulnerable teams.

Here are some resources to help you

The percentages shown are based off the total number of staff members who **received** the email.

For example if 100 people received the email and 50 people opened it – the email open rate would be 50%.

- **Email open rate** = the percentage of people that opened it
- **Email click-through rate** = the percentage of people that clicked on the link
- **Phishing success rate** = the percentage of people that clicked the link and inputted some personal information

Task 2: Interpret phishing simulation results

Question 1 of 1

Which teams performed poorly in the phishing simulation?

Team	Email open rate	Email click-through rate	Phishing success rate
IT	80%	2%	0%
HR	100%	85%	75%
Card Services	60%	50%	10%
Reception	40%	10%	0%
Engineering	70%	4%	1%
Marketing	65%	40%	38%
R&D	50%	5%	2%
Overall average	66%	28%	18%

☐ Marketing and Card Services teams☐ IT and Reception teams☒ HR and Marketing teams☐ HR and Engineering teams

Great Work!

Correct! The HR and Marketing teams performed poorly in the simulation and should receive further training.

Why this is important

Task 2: Interpret phishing simulation results

Create a short presentation

Now that you've analyzed the results, it's time to create a short presentation (3-5 slides) providing some awareness and training materials for the two teams that appear to be most susceptible. This will help us improve the security awareness of the teams that performed poorly in this campaign.

To help prepare your presentation slides, you can use the template provided below.

Phishing presentation template
 You can use this template to create your 3-5 slide presentation
[Click to download file --](#)

Remember that employees at times view training as boring - so try to make the presentation clear, concise and easy to understand. Try to educate employees on what phishing is, as well as provide examples of tactics often used. Use any resources you choose, the more creative, the better!

Estimated time for task completion: 1 hour depending on your learning style.

Example Presentation

Great work!

Take a look at this example presentation, which has been prepared by a Security Awareness professional at Mastercard, to learn how they would have approached this task.

Example Phishing Presentation
[Click to download file --](#)

The main takeaway points from the example presentation include:

1. They use contextual & visual examples of how to spot phishing emails
2. The presentation is clear, concise & heavy on the visuals
3. They provide clear & concise action points
